

MUHAMMAD ABDULLAH

FULL-STACK SOFTWARE ENGINEER

Muscat, Oman | +968 93845217 | abdullah@abdullahwaheed.com.pk | [linkedin.com/in/9abdullah9027](https://www.linkedin.com/in/9abdullah9027) | github.com/9abdullah9027 | abdullahwaheed.com.pk

PROFESSIONAL SUMMARY

Full-stack software engineer experienced in production web applications, mobile applications, backend administration systems, and Linux/VPS infrastructure. Built and deployed a heavy-machinery parts cross-reference platform supporting more than 7 million records. Strong background in Next.js, React, Laravel, PHP, Node.js, Flutter, MySQL, Supabase, REST APIs, Docker, data ingestion, and production deployment.

TECHNICAL SKILLS

Frontend: Next.js, React.js, Svelte, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, GSAP, Lenis, Leaflet.js

Backend and Data: Laravel, PHP, Node.js, REST APIs, WebSockets, MySQL, Supabase, relational database design, CSV ingestion, bulk imports, validation, duplicate detection, data synchronization

Mobile: Flutter, Dart, cross-platform mobile development, Google Sign-In, responsive mobile interfaces

DevOps and Infrastructure: Docker, Linux, Ubuntu, VPS administration, Hostinger, Contabo, cPanel, SSL/TLS, DNS, domain configuration, Odoo ERP

Product and Delivery: Admin panels, CMS, CRM workflows, analytics, SEO, UI/UX design, system architecture, production deployment

PROFESSIONAL EXPERIENCE

Full-Stack Developer, Contract | FilterCrossHub | Jul 2026 - Sep 2026

Remote

Technologies: Next.js, Laravel, PHP, MySQL, Docker, CSV data pipelines, web analytics

- Built and launched filtercrosshub.com, a production cross-reference search platform for heavy machinery parts, using Next.js for the customer-facing application and Laravel for the backend administration panel.
- Designed the database architecture and optimized the search workflow to return cross-reference results in milliseconds across more than 7 million parts records, with no noticeable delay.
- Created bulk CSV import tools with data validation and duplicate detection, enabling administrators to upload large datasets efficiently and safely.
- Developed an unresolved-search workflow that forwards missing user queries to the administration panel for manual review, approval, and catalog expansion.
- Implemented bidirectional HiFi product cross-referencing, real-time visitor monitoring, manual parts management, Docker containerization, server configuration, and production deployment.

Full-Stack Developer, Contract | Leuaora Hotels | Jul 2026

Remote

Technologies: Next.js, JavaScript, lead management, CRM workflows, communication tracking

- Delivered a centralized lead-management platform that enabled hotel staff to create, assign, reassign, and update sales leads.
- Implemented shared histories for calls, messages, notes, follow-ups, ownership, and lead progress to improve coordination and accountability.

Full-Stack Web and Mobile Developer, Contract | Bahria Food Street | May 2026 - Jun 2026

Lahore, Pakistan / Remote

Technologies: Next.js, JavaScript, Tailwind CSS, WebSockets, Flutter, Dart, REST APIs, Google Sign-In

- Delivered an integrated restaurant platform consisting of a production website, Flutter mobile application, and centralized administration panel within six weeks.
- Built administrative tools for menu and content management, advertising, financial oversight, order status updates, and printable customer receipts.
- Developed an Uber Eats-style mobile browsing experience and connected the website, mobile application, and administration panel through shared APIs.

Web and Infrastructure Engineer | Next Generation Solutions LLC | Feb 2026 - Apr 2026

Muscat, Oman

Technologies: Next.js, GSAP, WhatsApp API, Google Analytics, Docker, Ubuntu, Odoo ERP

- Delivered a 12-page corporate website with animated storytelling, WhatsApp enquiry automation, an ROI calculator, and technical SEO; achieved a 95 percent performance score, top-two search placement, and 40-50 percent traffic growth.
- Migrated production services from shared hosting to an Ubuntu VPS and containerized Odoo ERP and three production websites with Docker.
- Restored critical services after major outages, remediated SQL injection vulnerabilities in a legacy WordPress stack, and configured SSL and server monitoring.

Full-Stack Engineer, Contract | Aer Lingus Virtual | Jan 2026 - Feb 2026

Remote

Technologies: Next.js, TypeScript, Supabase, Discord webhooks, SMTP, RBAC

- Built an operations portal with email-verified registration, administrative approval, role-based dashboards, and a nested PDF document library with blob storage.
- Automated operations reporting with conditional forms, escalation rules, comment locking, and simultaneous Discord and email notifications.
- Implemented NOTAM expiration, acknowledgement controls, recruitment workflows, live METAR data, and runway selection; migrated from WordPress/cPanel to Hostinger, improving performance by 80 percent and organic traffic by 50 percent.

Frontend Engineer, Contract | ORYX Virtual | Dec 2025 - Jan 2026

Remote

Technologies: React.js, Svelte, GSAP, Tailwind CSS

- Developed a production marketing website with GSAP scroll animation and comprehensive on-page SEO, contributing to 30 percent organic traffic growth and top Google search placement.

Full-Stack Developer, Contract | Eleciam LLC | Nov 2025 - Dec 2025

Remote

Technologies: React.js, PHP, MySQL, REST APIs, Hostinger

- Built and deployed an internal hotel booking platform with role-based access control, an administration dashboard, and check-in and check-out APIs, reducing booking processing time by 40 percent.

Freelance Developer and Director of Operations, Volunteer | Self-Employed / PIA Community | 2020 - Present

Remote

Technologies: Full-stack development, UI/UX, team operations, project delivery

- Deliver paid web and software projects from requirements through deployment, commonly achieving 30-50 percent traffic growth and top-three search rankings.
- Led daily operations for PIA Community from Jun 2020 to Sep 2024, managed distributed teams, coordinated online initiatives, and produced UI/UX specifications for internal tools.

SELECTED PROJECTS

The Orbit Media - Agency Website | Sep 2026

Technologies: Next.js, TypeScript, Tailwind CSS, technical SEO

- Designed and built theorbitmedia.co from the ground up for a digital agency with offices in Lahore and London: sub-second page loads, a custom design system, and no page builders.

MCF Marks Consultant Funds - Investor Portal and Admin Dashboard | Apr 2026

Technologies: Next.js, TypeScript, Supabase, 3D/WebGL

- Built mcfinvestment.com: a 3D interactive website, an investor dashboard for cryptocurrency deposits and withdrawals with transaction verification and tiered ranks, and an administration panel for profit and commission allocation.

Pakistan Virtual Airlines - Brand Website and Portal | Mar 2026 - Apr 2026

Technologies: React, Vite, Tailwind CSS, GSAP, Lenis, Leaflet.js

- Created an aviation heritage website with a custom design system, interactive route map, and boarding pass generator integrated with the ALVA portal.

Smart Clinic Management System | Oct 2025 - Nov 2025

Technologies: React.js, Tailwind CSS, REST API design

- Developed secure doctor and patient dashboards with role-specific navigation; UX improvements reduced navigation time by 35 percent and increased capacity by 20 appointments per day.

EDUCATION

Bachelor of Science in Computer Science | NFC Institute of Engineering and Technology, Multan, Pakistan | Expected Jan 2028

Current status: Third-year student

High School Diploma, Computer Science | Pakistan School Muscat, Oman | Aug 2023

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Foundations Associate | Cisco Introduction to Cybersecurity | Cisco Networking Basics | Cisco Endpoint Security
